

Crescent Tools Reveals Its New Line of Tradesman Punches and Chisels

The New Lineup of Product Brings Meaningful Improvements to an Often-Neglected Category

SPARKS, Md. - From their craftsmanship and cutting-edge features to their superior, industry-leading performance, new Crescent® Tradesman Punches and Chisels deliver more strength and durability than standard tools. Features such as full-metal cores, 17-percent larger strike caps, and extended length design provide customers with more ease and efficiency in all applications.

Crescent® Tradesman Cold Chisels and Pin Punches feature extended length and a recessed control panel design, while Wood Chisels have larger overstrike caps and precision-ground carbon steel blades. Also included in the Crescent Tradesman Punches and Chisels line are Nail Punches that deliver outstanding performance with large strike caps and innovative dual flat sides that eliminate tool roll-off.

“We’ve added innovative new design elements into every product in the Crescent Tradesman Punches and Chisels line,” said Ethan Bolderson, product manager. “With full-metal cores, oversized strike caps, dual-material handles, and other performance and convenience features, these tools are safer, stronger, and sturdier than other products in the industry.”

Crescent Tradesman Punches and Chisels are available as individual pieces or in a variety of sets. To view the full product offering, please visit www.crescenttool.com.
